

A 30-minute conversation to scope an AI Activation Program for your team. Answers feed directly into **AI Activation Studio**, which turns them into a ready-to-run program — schedule, activities, and learning resources included.

EXECUTIVE SPONSOR	TEAM / ORG COVERED	INTERVIEWER & DATE	TARGET KICKOFF
-------------------	--------------------	--------------------	----------------

1 Key Objective Outcomes — pick the 2–3 that matter most; outcomes drive everything else

- ☐ Adoption — e.g. 80% of the team uses an AI tool in their weekly workflow by program end
- ☐ Tangible output — e.g. every participant ships one AI-assisted deliverable (report, app, automation)
- ☐ Time saved — e.g. cut a recurring task (status reports, data cleanup) by 30%
- ☐ Reusable assets — e.g. a shared library of 20+ team prompts, or 3 prototyped automations
- ☐ Culture / confidence — e.g. move the team from "curious" to "fluent and comfortable"
- ☐ Other:

Notes / specifics:

2 Audience & Team Size

- Team size

☐ Pod (<10)

☐ Team (10–30)

☐ Department (30–100)

☐ Org-wide (100+)
- Roles / functions
- Starting level

☐ Mostly beginners

☐ Mixed

☐ Mostly comfortable already
- Distribution

☐ Co-located

☐ Hybrid

☐ Fully remote / multi-timezone

3 Time Commitment & Duration

- Per learner

☐ ~1 hr/week

☐ 2–3 hrs/week

☐ Daily challenge

☐ Dedicated sprint

PROGRAM SHAPE	DURATION	BEST FOR
☐ Lunch & Learn Series	4–8 wks · 1 hr/wk	Low-commitment introduction
☐ 1-Day Workshop	1 day	Quick enablement, off-sites
☐ Weekly Sprint	1–2 weeks	Focused skill burst
☐ Monthly Marathon	4 wks · daily	Deep skill building
☐ Self-Paced Course	Open-ended	Async, global teams
☐ Hackathon	1–2 days	Innovation, team bonding
☐ Certification Prep	2–4 weeks	Formal skill validation

4 Capability Tracks — choose 1–5; each becomes a stream of hands-on activities

- ☐  Prompt Engineering

Effective prompts, iteration, prompt patterns — the universal foundation
- ☐  Content Generation & Writing

Emails, reports, summaries, docs, social posts
- ☐  Data Analysis & Insights

Pattern recognition, dashboards, data storytelling
- ☐  Visual Creation & Design

Image generation, presentations, brand visuals
- ☐  Application Building

No-code / vibe-coded apps, tools, dashboards, bots
- ☐  Process Automation

Workflow automation, SOPs, decision trees
- ☐  Presentation & Communication

Decks, pitch materials, exec summaries, scripts
- ☐  Creative & Storytelling

Narratives, multimedia — engagement-focused
- ☐  Customer Intelligence

Sentiment analysis, journey mapping, personas
- ☐  Research & Strategy

Market research, competitive & strategic analysis
- ☐  Learning & Training Design

Course creation, quizzes, onboarding, knowledge bases
- ☐  Code & Technical

Code generation, debugging, docs, API integration

Top priority track(s):

5 Tool & Platform Scope

- ☐ **Equinix-approved only** — work strictly within sanctioned, IT-blessed tools
- ☐ **Mix (recommended)** — anchor on approved tools, explore select outside tools in a safe sandbox
- ☐ **Outside / exploratory** — broad exposure to the wider AI landscape

Named tools to include / avoid:

6 Learning Scope

- ☐ **Work-specific** — apply AI only to the team's real, current workflows
- ☐ **General fluency** — transferable skills usable beyond today's job
- ☐ **Both** — ground every skill in a real task, but teach the why so it transfers

Notes:

7 Learning Resources — the Studio's catalog blends two sources

- ☐ **Equinix-included** — LinkedIn Learning (org membership), Microsoft Learn
- ☐ **Free external** — DeepLearning.AI, Anthropic, OpenAI, Kaggle, NVIDIA, IBM, YouTube
- ☐ **Mix of both** — curated per track

8 Recognition, Governance & Logistics

Engagement / incentives ☐ Leaderboard ☐ Demo day ☐ Badges / certs ☐ Exec shout-outs ☐ Prizes

Data & compliance limits e.g. no customer PII, no proprietary code in external tools: _____

Comms channel ☐ Slack ☐ Teams ☐ Email ☐ Other: _____

Budget / constraints _____

Exec sponsor's role ☐ Kickoff message ☐ Weekly visibility ☐ Demo-day judge ☐ Hands-off

9 Next Steps

1. Synthesize these answers in **AI Activation Studio**.
2. Generate a draft program — tracks, schedule, and resources auto-populated.
3. Review draft with sponsor; adjust and lock.
4. Export the launch kit (kickoff comms, checklist, learner site) and go live.
